WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Plate 997 x 497 mm with 25 mm flanges folded up on all four edges;
the side flanges stop 25 mm short of each corner (they clear the
front and back panel flanges). Fold the long flanges first.
Holes, measured from the centre lines (x sideways, y front-back):
eight 11 mm bolt holes matching the plinth top flange;
four 40 mm socket holes over the anchors, at 475 each side and
220 each side of the centre, closed later with plastic caps;
one 25 mm gland hole for the grid cable at x 340, y 120.
Fit: bolted to the plinth with eight M10 bolts, heads inside, nuts
under the top flange (bolt it with the plinth on trestles).
The walls are riveted to the flanges with 4 mm blind rivets.
Check: flanges square, holes line up with the plinth.
