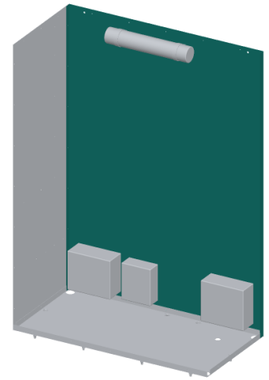
Scale 1:20; looking at the right side (along -X)



WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Blank 1,000 x 1,400 mm plus a 25 mm flange on each side edge,
folded forward (toward the street side) along the full height
less 1.5 mm at top and bottom.
Seen from the front, mark and drill as you fit the parts:
the controller, MPPT and grid boxes screw straight to it, each by
its own fixing holes (mark through the box), M5 with sealing washers;
the aerosol unit's two straps, two M5 each, 1,300 to 1,340 up;
two 9 mm holes for the roof beam cleat bolts at 410 and 430 each
side of the centre, 1,376 up. Heights from the bottom edge.
Fit: stands on the floor pan's back flange edge; the side panels
overlap its flanges; 4 mm blind rivets at about 100 mm pitch.
Check: flanges at 90 degrees, panel flat within 3 mm.
