WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Plate 994 x 280 mm with 25 mm flanges folded down on all four edges (fold the long edges first, then the short ones).
Fit: top face 380 mm above the ground (278.5 above the floor), front edge 60 mm in front of the centre line, back edge 220 mm behind it, clear of the back panel flanges.
Its side flanges are riveted to the side panels, four rivets each.
Chargers stand on it, each held by four M5 screws through the shelf at the charger's own fixing holes (mark through the charger), at 345 and 115 left of centre for bays 1 and 2 (115 and 345 right of centre for bays 3 and 4 later).
Check: level within 2 mm when riveted in.
