WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Plate 994 wide x 823.5 mm tall, standing 110 mm behind the centre line from 673.5 to 1,497 mm above the ground.
Top flange 20 mm folded forward over 876 mm of the width; side flanges 20 mm folded back, stopping 42 mm below the top.
Notch both top corners 44 wide x 41 deep, starting 15 mm in from the side edge: the roof beams pass through the notches.
Vent port per fitted bay: 60 x 60 mm on the bay centre, 466.5 to 526.5 mm up from the bottom edge (1,140 to 1,200 above ground).
Fit: bottom edge riveted to the bay deck's back flange; side flanges to the side panels; top flange to the roof; each liner back riveted to it round the port. Seal the notches with fire-rated sealant once the roof is on.
Check: the ports line up with the liner ports.
