WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut 60 x 3 mm strip about 430 mm long; deburr.
Bend 90 degrees twice: an upright 335 mm tall, a top leg 49.5 mm long reaching back, and a tab 43 mm long turned down.
Tab: two 4.5 mm holes, 20 mm apart, for M4 screws through the liner back wall.
Catch block 50 x 8 x 8 mm: rivet or screw it to the front face of the upright, its underside 318 mm above the upright's bottom end. It sits 1 mm behind the pack's latch pawl and just above it.
Fit: the bottom end stands 10 mm down in the cradle's catch slot; the tab is screwed to the liner back wall.
Check: with a pack dummy in the cradle the pawl passes under the catch with the 1 mm gap, and the upright is vertical.
