WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

A box 850 wide, 133 deep and 70 tall, open underneath, folded from sheet: front wall with a 20 mm flange forward; end walls with 8 mm flanges outward; back wall with a 15 mm flange backward; top overhanging the back wall by 10 mm (rain lip).

Back wall: twelve slots 50 x 40 mm, 12 mm above the roof, on a 71.8 mm pitch starting 30 mm from each end.

Fit: stands on the roof over both fan holes, front face 98.5 mm behind the centre line; flanges riveted and sealed to the roof.

Air and any vented gas leave through the back slots, away from the rider side.

Fit insect mesh behind the slots.

Check: both fan holes fully inside the hood.
