WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Door: 172 x 526 x 2 mm plate; round the corners 3 mm.
Pull handle on the front, 45 to 70 mm right of the door centre,
243 to 283 mm up from the door's bottom edge.
Lock tongue: a 4 mm steel angle riveted to the back; its tongue
stands 21 mm back, 50 to 54 mm right of centre, 253 to 273 mm
up, with a 6 mm hole for the lock bolt.
Hinge: a stainless piano hinge 480 mm long, riveted to the door's
front face along its left edge and to the front panel beside it.
Gasket: 7 x 3 mm closed-cell EPDM strip stuck to the panel round
the opening, 1 mm out from its edge.
Blank plate: the same 172 x 526 plate with four 5.5 mm holes
for M5 security screws into rivet nuts in the panel.
Check: the door closes on the gasket evenly, tongue in the lock.
